12 0-ce-mac47 All docker-compose functionality from within WSL Easy to keep all docker software up to date and not stuck on old versions.

1. docker stuck starting
2. docker stuck starting mac
3. docker desktop kubernetes stuck starting

One small note: when I did this, I did need to kill Docker for Windows and restart it after checking the checkbox, because the initial checking seemed to put it into a weird state..
